

# INTRODUCING **ëkcoscreen** THE FUTURE STANDARD IN URINAL MICROBIAL CONTROL

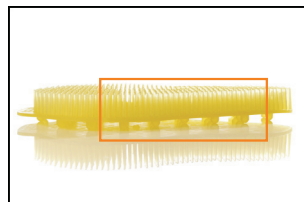

Regular urinal

Urinal with ìkcoscreen

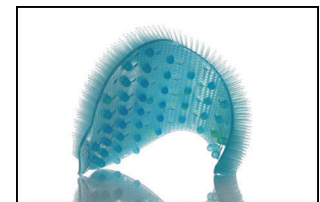

Patent Pending  
Sealed Bristle Technology™

Anti-Microbial technology

Standard Size

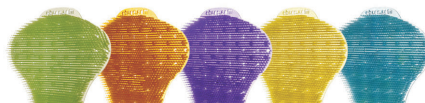

Flexible to fit any  
urinal model

## Prevents microbial transfer caused by **Splashback effect**

Our patent pending Sealed Bristle Technology™ prevents splashback and spread of disease-causing microbes caused by urine impacting the back wall or still water in a public urinal. With the reduction of splashback and our Anti-Microbial technology, a cleaner public restroom is possible.

- Patent Pending Sealed Bristle Technology™ eliminates splashback.
- Anti-Microbial technology is engineered into our proprietary resin.
- Lasts twice as long as other screens on the market.
- Emits a fresh, clean scent.
- Designed for heavily used public restrooms.
- Perfect for waterless urinals.

Available colors and fragrance
